**MECHANICALLY
HARVEST JATROPHA!**
We have over 50 years of
mechanical harvesting
experience.

MECHANICALLY HARVEST JATROPHA

Keep your labor cost as low as possible by operating as efficiently as possible. Your mechanical harvester can work 24 hours a day.

With the BEI Jatropa Wave Picking Mechanism you can selectively harvest Jatropa.

The BEI Brand Name is known Worldwide for durability and innovation.

The BEI Jatropa Wave Harvester is built to be capable of harvesting in wet fields (rainy season) and rough field conditions.

BEI offers multi-function harvesters that do more than just harvest your jatropa.

The BEI Jatropa Wave Harvester was field tested in Honduras at Agroipsa with David Erazo in August 2009!

BEI International, LLC
manufacturer of agricultural
equipment for over 50 years!

**An industry leader of innovations
for self-propelled wheeled and
tracks harvesters.**
